

**TECHNICAL INFORMATION****NATURAL WOOD WEAVE COLLECTION****PRODUCT DESCRIPTION**

The Roll-up and Roman Blind styles of operation are available, both of which hang flat when lowered. The Roll-up blind, as the name implies, rolls up neatly and can be adjusted by means of cord lock operation, as can the Roman Blind which folds evenly into 130mm gently staggered pleats.

**HEADRAIL AND HEADRAIL COMPONENTS**

The Wood Weave components consist of up to a maximum of 4 nylon bearing brackets and a nylon and brass cord lock, attached to the equivalent number of pressed steel plates, fitted to a Timber Headrail with a profile of 25mm deep and 30mm wide.

**CONTROLS**

The standard cord lock operation allows easy access to alter shading, as required. The controls may be fitted at the left or right hand of the blind. A brass eyelet is inserted into the woodweave fabric to bring the control cords to the front of the blind.

**FABRICS/MATERIALS**

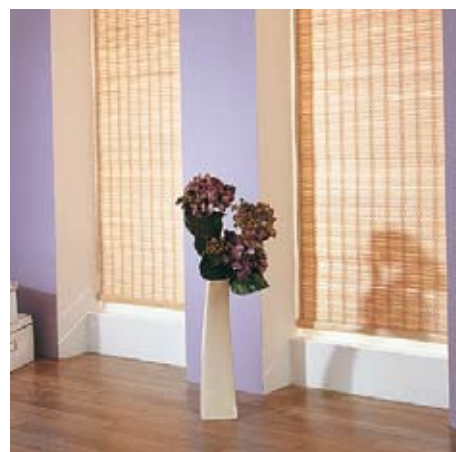

The choice of finishes is comprehensive and our range includes bamboo, stained natural wood textures, as well as painted finishes. The Natural Wood Weave Collections, other than the bamboos, are available with edge binding tapes - and this can create a whole new look. The Cotton Binding Tape is attached to the side of the blind, with the choice of 50 colours; you can co-ordinate perfectly, or contrast dramatically- to great effect! As with our wood venetian blinds, you also have the option of a beautifully crafted wood tassel. Instead of the barrel shape, which is offered as standard, you can choose from an eclectic selection.

**FIXINGS**

The headrail is held in place by means of an unusual U-shaped bracket with fixing points on top, face or side, measuring 35mm by 35mm.

**MAINTENANCE**

Care of the blinds is simple - a light dusting or even vacuuming will keep the Wood Weave looking good.

**ROMAN STYLE****ROLL-UP STYLE****RECOMMENDATIONS****Free Hanging Woodweave**

Maximum Width:	2000 mm
Maximum Drop:	2450 mm
Maximum Recommended Area:	3 sq m

**DECLARATION OF QUALITY:** All products detailed in this literature are manufactured exclusively in our own factory. This allows complete control over quality and also enables delivery to be tailored and guaranteed for each individual project. We are constantly striving to improve the product and reserve the right to alter specifications without notice.
